Honorable Mayor Bryan J. Baptiste Honorable William K. Asing, Chair And Members of the Kaua'i County Council County of Kaua'i 4444 Rice Street Lihu'e, Hawai'i 96766

LETTER OF TRANSMITTAL

The Comprehensive Annual Financial Report (CAFR) of the County of Kaua'i (the County), State of Hawai'i for the fiscal year July 1, 2002 to June 30, 2003 is hereby submitted to you by the Department of Finance.

Responsibility for both the accuracy of the data and the completeness and fairness of the information presented, including all disclosures, rests with the Department of Finance. It is believed that the data presented is accurate in all material respects and that it is provided in a manner designed to fairly set forth the financial position and results of operations of the County. All disclosures necessary to gain a maximum understanding of the County's financial affairs have been included.

The Department of Finance is tasked with the responsibility for establishing and maintaining an internal control structure and process that is designed to ensure that the assets of the County are protected from loss, theft, or misuse. It is also the responsibility of the Department of Finance to compile adequate accounting data to allow for the accurate preparation of financial statements in conformity with generally accepted accounting principles (GAAP). The internal control process is designed to provide reasonable, but not absolute, assurance that these objectives are met.

Management is required to make decisions and judgments as to the concept of what constitutes reasonable assurance in reviewing the internal control mechanisms. Management must also weigh the cost of the control to the benefit that will likely be attained.

This report includes all funds of the County of Kaua'i, including its component unit, the Department of Water (the Department), established by the County Charter as a semi-autonomous body of the County government. This component unit is included in the County's reporting entity for fair presentation of the basic financial statements and to be in conformity with GAAP. The Board of Water Supply is appointed by the Mayor and is accountable for the activities of the Department. It would be potentially misleading if omitted in the County's financial reports because of its existing debt issuance, common employee benefits, and other fiscal dependence.

The Reporting Entity

The County of Kaua'i, commonly known as The Garden Island, includes the populated island of Kaua'i and Ni'ihau. The county seat is located in Lihue, Kaua'i. The island of Kaua'i is located at the northwestern end of the five major Hawaiian Islands, approximately 95 miles from Oahu. The island was formed some 25 million years ago by volcanic action. It somewhat resembles the shape of a cone, 32 miles in diameter, with 549 square miles of area and 137 miles of coastline. Ni'ihau is a privately owned island encompassing approximately 70 square miles and is inhabited primarily by native Hawaiians who work on the Robinson Family ranch. Owners of the island grant limited access to the general public. The overall impression of Kaua'i is that of open spaces and vistas with rural communities throughout the coastal regions. From Hanalei valley with lush mountainous viewscapes to Waimea Canyon known as the Grand Canyon of the Pacific, Kaua'i has made itself a tourist attraction.

The County of Kaua'i has operated under the Mayor-County Council form of government since 1969. The executive branch of the County is headed by the Mayor who is elected on a non-partisan basis for a four-year term and with a two term limit. The legislative branch is the County Council which is composed of seven members who shall be elected at-large on a non-partisan basis, for a two-year term with no limit on terms.

There are no subordinate or separate municipal entities within the County of Kaua'i's jurisdiction. All powers of the County shall be carried into execution as provided by its Charter or by ordinance of the County Council and the Mayor. The State of Hawaii constitution sets limits on total bonded indebtedness of the County. The County did not issue any special assessment debt and there is no overlapping bonded debt on general obligation bonds.

The County of Kaua'i provides a full range of municipal services. These services include Public Safety (police, fire, civil defense, humane society, outreach program, highway safety grants, drug related grants, liquor control, lifeguards), Sanitation (wastewater, recycling and solid waste operations), Public Works (engineering, building and construction inspections and approvals, janitorial and repair and maintenance of its facilities), Culture and Recreation (public pools, parks and beaches, golf course, neighborhood centers, recreation programs, beautification program, auditorium, stadium), Public Welfare (elderly affairs, transportation, housing, community development and assistance programs), Highways and Streets (highway repairs and maintenance, street lights) and General Government (mayor's office, council services, finance, prosecuting attorney, planning, personnel services, economic development, county attorney's office). The proprietary funds are accounted for separately from the above expense functions. Combining costs would obscure the matching of revenues and expenses of their required fund classification.

Municipal services provided by the State of Hawai'i are excluded from this report. The State provides educational systems, health and welfare benefits, airport and harbor functions, hospitals, State highway system and judicial system. The major sources of State revenue are the general excise tax and the corporate and personal income taxes. The State passes through many federally funded formula and block grants and portions of the transient accommodation tax revenues (TAT) to the County.

Major tax revenue sources of the County consist of real property taxes, public service company taxes, fuel taxes, franchise taxes, and motor vehicle weight taxes. Other revenue sources include the transient accommodations tax, Federal and State grants, construction fees, development and impact fees, golf and wastewater user fees. There are no personal taxes levied by the County.

Economic Conditions and Outlook

Rebounding from the "9/11" tragedy and its impact on the island's economy, the County of Kaua'i has experienced significant increases in land assessment values thereby increasing property tax revenues by approximately 11 percent from the prior year. Kaua'i's economy has experienced a strong upswing in job creation as indicated by decreasing unemployment figures.

High Technology/Military

The Pacific Missile Range Facility (PMRF), with a payroll of approximately \$30 million and an employee base exceeding 650 civilian and civil service employees, is a significant employer of island residents. PMRF is the world's largest missile range and fleet training facility encompassing 40,000 square miles of restricted airspace and a 1,000 square mile underwater tracking area. The facility offers the military the equipment and facilities to train ships, submarines, and the Marines and Army. The site is the testing ground for a new defense system allowing Aegis cruisers to receive missile warning signals from airborne radio stations up to 80 miles away. Prior to utilizing this system, a ship's on-board radar would only be able to detect missiles up to 19 miles away. A number of private industry technology firms have contracts with PMRF. The contractors have experienced accelerated growth since the "9/11" incident. The facility also supplements the visitor industry with transient travelers and business conferences.

West Kaua'i Technology and Visitor Center

With funding assistance from the U.S. Department of Commerce-Economic Development Administration, the Center was built to encourage "high-tech" companies to come to Kaua'i. Current tenants of the Center include Textron Systems Corporation, Solipsys Corporation, and Oceanit Laboratories.

Textron Systems Corporation's work on Kaua'i includes the design and construction of an electro-optical scanning system for the military. Solipsys recently provided its Exercise Scenario Planning and Real-time Integrated Test (ESPIRIT) to the PMRF. Solipsys also expanded their operations by opening an office in Lihue. ESPIRIT offers the PMRF a better method of event planning, monitoring and evaluation. It is also working with the PMRF to simulate and monitor intricate military exercises. Oceanit Laboratories is a Hawaii-based firm that provides coastal and environment engineering services and research and development in areas such as advanced theater missile defense.

Diversified Agriculture

Initiatives to diversify Kaua'i's agricultural crops have intensified over the last few years. Sugar, shrimp farming, seed corn, coffee, papaya, guava and taro have continued to increase in yield and acreage. Kaua'i's only tropical fruit disinfestations/packing plant, which came on-line in July of 1998, initially helped the marketability for crops such as papaya to the mainland United States and abroad. This plant has been closed for more than two years due to management problems, and the County has actively supported the efforts of the University of Hawaii and the Agribusiness Development Corporation to reopen the facility. The County is also currently working with the range-fed beef industry, which provides a healthier alternative to grain fed beef. The need for a slaughterhouse and packing facility is paramount to the successful expansion of the industry.

The viability of sugar production for Kaua'i rests with one remaining plantation, Gay and Robinson. Widespread optimism was bolstered when the past season yielded 55,000+ tons with increases projected for the next two years. Gay and Robinson is looking towards increasing profits through the sale of value added products, with a goal of refining and selling up to 10,000 tons of sugar under its own name.

The County is actively exploring opportunities to help private industry companies develop and market products for sale within the State and abroad. The recent growth of e-commerce presents both an opportunity to market "made on Kaua'i" products and market our destination through our products. This represents the ideal vehicle through which we can cross-promote tourism and agriculture.

Tourism

Tourism held it's own in a difficult year that included the Iraq War and Severe Acute Respiratory Syndrome (SARS). While total visitor arrivals showed a slight decrease of 2.9 percent from 2002, visitors who traveled only to Kauai during their Hawaii vacation increased 8.3 percent. Kauai also made gains in the average length of stay for visitors: increasing to 7 days per visit in 2003 versus 6.7 days in 2002.

This trend is what the island's visitor industry has actively been pursuing through its marketing programs. With the limited amount of tourism that Kaua'i's infrastructure can practically bear, the strategy has been to entice visitors to stay longer and spend more money while on the island, rather than simply to attract more visitors.

Tourism will be bolstered by the introduction of two new American-flagged cruise vessels by Norwegian Cruise Lines and an increase in the number of direct flights to the mainland and international cities by United, American, Hawaiian, and Aloha airlines.

Construction

Economists statewide predict that construction will continue to surge and lead economic growth in 2004. With real estate sales for homes and condominiums rising and mortgage rates staying in the 5-7 percent range, it is not a surprise that the construction industry will be busy in the future. The only resort that has not rebuilt its facilities after Hurricane Iniki has made plans to start reconstruction in the near future.

Major Initiatives and Achievements

The County's major focus during the year was to bring the government back to the people, that is, to give the public more input as to the planning and needs of the community. The Mayor's Kaleo O' Kaua'i public meeting program held throughout the island's neighborhood was meant for this purpose.

The following are some of the major initiatives and achievements of fiscal year 2003:

Public Works – The near completion of the new \$21 million Police/Prosecuting Attorney/EOC facility. The start of renovations to the Pi'ikoi building in the Lihue Civic Center Complex that will allow the County to centralize various County agencies.

Solid Waste - Locating a new site for solid waste disposal that will replace the nearly filled current site at Kekaha. New recycling programs and a processing center will help delay the Kekaha landfill site from reaching its capacity. The County is seeking approval for vertical expansion of the current Kekaha landfill site that may extend the existing life of the landfill another five years.

Finance - The County was required to implement Governmental Accounting Standards Board (GASB) Statement No. 34, Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments, GASB Statement No. 37, Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments: Omnibus, GASB Statement No. 38, Certain Financial Statement Note Disclosures, and Interpretation No. 6, Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements, during fiscal year 2003. These accounting pronouncements resulted in significant changes to the County's basic financial statements.

Road Maintenance – Two large road reconstruction projects, Rice Street and Kekaha Road, funded mainly by Federal Highway Administration funds, were nearly completed at June 30, 2003. The federal government's share of these reconstruction projects was approximately \$10 million.

Housing - U.S. Housing and Urban Development (HUD) made \$7.4 million available for the Section 8 lower income housing rental program for the fiscal year ended June 30, 2003. Other housing projects funded by HUD this year include the Community Development Block Grants and Home Investment program that totaled nearly \$3 million. The primary objectives of these grants are to execute a consolidated action plan to develop viable communities, including decent housing and a suitable living environment, and expanding economic opportunities, principally for persons of low and moderate income. Besides historic preservation and restoration projects, the Housing agency is providing low interest loans for moderate renovations and repairs and low interest mortgage loan financing to assist low-income first-time home buyers for the purchase of an existing dwelling to be used as a primary residence.

Recreation – U.S. Department of Transportation funded \$2.3 million for a scenic 2.1 mile Lydgate bike path along the east coast of Kaua'i. Visitors and residents are now using the bike path which was completed this year. Also in the planning stages is an extension of the bike path to an eventual length of 20 miles. This extension is expected to be partially financed with Federal matching funds.

Public safety - Kaua'i and the State of Hawaii are plagued with increasing drug use, especially crystal methamphetamine. Top priorities of the County administrators and Kauai's lawmakers are increased efforts to combat illegal drug dealers and to establish a rehabilitation program and a treatment facility for drug users who want to provide themselves a productive and healthy life after drug treatment. Statewide and local resources are being pursued to address this pervasive problem.

Budgeting Controls

The County maintains a budgetary control system that will enable County departments to be in compliance with legal provisions incorporated in the annual budget ordinance and capital improvement budgets as approved by the Kaua'i County Council.

By legal provisions of the County Charter and annual budget ordinance, every appropriation except for those made in the capital improvement budget shall lapse at the close of the fiscal year if the appropriation remains unencumbered or unexpended. The County utilizes an encumbrance accounting system for its operating funds whereby contracts, purchase orders and other commitments are recorded as reservations of fund balances.

The County Charter requires that the annual budget ordinance be balanced. Total estimated expenditures should not exceed estimated revenues. Budget to actual statements of revenue, expenditures, and changes in fund balances are presented for comparison of legally enacted budget appropriations (original and final) to expenditures and encumbrances actually incurred.

Cash Management

During the fiscal year, County funds were held in local institutions as follows: Bank of Hawaii - 38 percent, First Hawaiian Bank - 14 percent, Central Pacific Bank - 8 percent, and American Savings Bank - 1 percent. Temporarily idle cash available for investment for all funds averaged \$64.2 million for the fiscal year that provided an average weighted yield of 2.44 percent. Authorized and fully collateralized investments included time certificates deposits (TCD's), U.S. Government Agencies mutual fund investments and bank repurchase agreements (REPO's).

Risk Management and Insurance

The goal of risk management is to enable management to prevent or minimize losses. Management has obtained adequate insurance coverage for liability and property losses for the County to prudently safeguard the assets and minimize potentially disabling circumstances to operate the county government. The County of Kaua'i initiated a self-insurance program when the "hard insurance market" made it impossible to get insurance. At the same time, the loss experience of many major reinsurance carriers was reaching unacceptably high levels, which forced an increase in premiums. A reserve balance of \$2.1 million in the self-insurance fund is available to cover damages to County-owned vehicles and workers' compensation claims under \$500,000 and in excess of \$1.5 million.

Employee Union Contracts

County employees are members of seven different bargaining units. All seven bargaining units have contracts that expired on June 30, 2003. The Police Officers union (SHOPO) has signed a four year contract for its members with wage increases averaging four percent per year starting July 1, 2003. Other employee union collective bargaining negotiations are in process or are in arbitration.

Independent Audit

The County Charter requires an annual financial audit by licensed and independent certified public accountants. The basic financial statements in this report have been audited by KMH LLP. The financial statements of the Department of Water, an enterprise fund included in the government-wide financial statements as a discretely presented component unit, were also audited by KMH LLP. The County is also required to obtain an annual "single audit" in conformity with the provisions of the Single Audit Act of 1984, as amended, and the U.S. Office of Management and Budget Circular A-133, "Audit of States, Local Governments, and Non-Profit Organizations." Information pertaining to this single audit, including the schedule of expenditures of federal awards, findings and recommendations, and the report of the independent accountants on the internal controls and compliance with all applicable laws and regulations are included in a separate report.

By contract the auditor must express an opinion on the fair presentation of the basic financial statements and required supplementary information in conformity with generally accepted accounting principles and in accordance with auditing standards as set forth by the American Institute of Certified Public Accountants and the General Accounting Office. The supplemental and other supporting schedules are presented for additional analysis and are subjected to certain limited auditing procedures and an "in relation to" audit opinion. The introductory and statistical sections of the CAFR are unaudited which is explicitly stated in the audit opinion.

Awards

The Government Finance Officer Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the County for its CAFR for the fiscal year ended June 30, 2002. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR, whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

This award is valid for a one-year period only. We believe our current CAFR continues to meet the requirements and we are submitting it to the GFOA to determine its eligibility for another certificate. The County has received this award for the tenth consecutive year.

Acknowledgments

The preparation of the CAFR on a timely basis was made possible by the efficient and dedicated services of the entire staff of the Department of Finance and fiscal personnel in other County departments. We are grateful to the Public Works department for their assistance and contributions in gathering the information needed for the infrastructure reporting. We also want to thank the Mayor and the County Council for their interest and support in planning and conducting the financial operations of the County in a responsible and progressive manner.

Respectfully submitted,

Michael H. Trest_

Independent Auditor's Report

To the Chair and Members of the County Council of Kauai, Hawaii Lihue, Kauai, Hawaii

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the County of Kauai, Hawaii (the County), as of and for the year ended June 30, 2003, which collectively comprise the County's basic financial statements as listed in the table of contents. These financial statements are the responsibility of County management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the County, as of June 30, 2003, and the respective changes in financial position and cash flows, where applicable, and the respective budgetary comparison for the General Fund and Major Special Revenue Funds thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As described in Note 1, the County has implemented a new financial reporting model, as required by the provisions of GASB Statement No. 34, Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments, effective July 1, 2002.

In accordance with Government Auditing Standards, we have also issued our report dated November 26, 2003, on our consideration of the County's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

The management's discussion and analysis on pages 12 through 20, is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the County's basic financial statements. The introductory section, combining and individual fund financial statements and schedules, and statistical tables are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund financial statements and schedules listed in the table of contents under other supplementary information have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical tables have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

KMH LLP

KMH LLP

November 26, 2003 Honolulu, Hawaii

As management of the County of Kauai (County), we offer readers of the County's financial statements this narrative overview and analysis of the financial activities of the County for the fiscal year ended June 30, 2003. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, the basic financial statements and the accompanying notes to those financial statements.

FINANCIAL HIGHLIGHTS

- The assets of the County, excluding the component unit, exceeded its liabilities (the net assets of the primary government) at the close of the fiscal year by \$451.7 million, an increase of \$20.8 million from the prior fiscal year in its government-wide financial statements.
- As of the close of the fiscal year, the County's governmental fund financial statements reported combined
 ending fund balances of \$54.3 million, a decrease of \$2.4 million in comparison with the prior year.
 Approximately 34 percent of this total amount, or \$18.4 million, is available for spending at the County's
 discretion (unreserved-undesignated fund balance).
- At the end of the current fiscal year, unreserved-undesignated fund balance for the general fund was \$9.8 million, an increase of \$1.2 million from the prior year.
- The County did not issue new general obligation bonds or State Revolving Fund (SRF) Loans during the current fiscal year. In 2003, normal maturity of principal reduced the general obligation bonds by \$3.5 million and the SRF loans by \$800,000.

OVERVIEW OF THE FINANCIAL STATEMENTS

This is the first year the County has prepared the Comprehensive Annual Financial Report (CAFR) using the new financial reporting requirements as prescribed by the Government Accounting Standards Board (GASB) Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments. This new form of governmental financial reporting includes, as its basic financial statements, the statement of net assets and statement of activities along with the traditional fund accounting financial statements. All capital assets, including land, construction in progress, buildings, equipment, and infrastructure assets are reported in the statement of net assets. The total liabilities in the statement of net assets similarly includes all long-term liabilities of the County including general obligation debt outstanding, accrued compensated absences, landfill closure and post-closure costs and other long-term loans. The statement of activities reports all expenditures by function, including depreciation expense. The government-wide financial statements provide a clear picture of the County as a single, unified entity instead of components of funds and accounts. Compliance to legal budget requirements is provided by budget to actual comparisons included in the CAFR.

Fund financial reporting is well-suited to achieving the goal of fiscal accountability by demonstrating legal compliance with enacted budgets of the County's legislative body. The government-wide statements provides operational accountability that will measure efficiency and effectiveness of operations similar to that of other private-sector businesses therefore making analysis and comparability of financial activities among different government entities possible.

BASIC FINANCIAL STATEMENTS

Government-Wide Financial Statements - The two government-wide financial statements are designed to provide readers with a broad overview of the County's finances, in a manner similar to a private-sector business. It presents the financial picture of the County from the economic resources measurement focus using the accrual basis of accounting.

The statement of net assets presents information on all of the County's assets (including capital and infrastructure assets) and liabilities (including long term debt), with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the County is improving or deteriorating.

The statement of activities presents information showing how the County's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses including depreciation expense are reported in this statement for some items that will result in cash flow differences. The accounting principle of matching revenues with expenses especially in capitalizing capital assets instead of recording an expenditure for when it was purchased and expensing the capital asset over its life will present a equitable approach in determining total expenses for the year.

Both of the government-wide financial statements distinguish functions of the County that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the County include general government, public safety, public works, highways and streets, sanitation, public welfare, and culture and recreation. The business-type activities of the County include the Public Housing Fund, the Sewer Fund, and Golf Fund.

The government-wide financial statements include the governmental activities and business-type activities of the County (known as the primary government) and the Department of Water Supply (Department), which is a semi-autonomous entity, and is reported separately from the primary government, as a component unit. Complete financial statements of the Department, which include its Management's Discussion and Analysis (MD&A), may be obtained from the Department of Water at 4398 Pua Loke, Lihue, Kauai, Hawaii, 96766.

These government-wide financial statements can be found in the first section of the basic financial statements.

Fund Financial Statements - A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The County, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the County can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds - Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. These funds are reported using the modified-accrual basis of accounting.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental funds balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The County's governmental fund types are the general, special revenue, debt service and capital projects funds. The County maintains 22 individual governmental funds. Governmental fund financial statements include a balance sheet and the statement of revenues, expenditures, and changes in fund balances. The General Fund, Housing and Community Development Revolving Fund, Federal Grants Fund, and Bond Fund are considered major funds. Data from the other 18 non-major governmental funds are combined into a single, aggregated presentation as Other Governmental Funds. Budgetary comparisons have been provided for the County's General and major special revenue funds (Housing and Community Development Revolving Fund), to demonstrate compliance with its annual appropriated budget as required for GAAP financial statements.

Proprietary Funds - Services for which the County operates similar to a business-type activity are reported in proprietary funds. These proprietary funds provide the same type of financial information (long and short term) as the government-wide financial statements, only in more detail. The County's enterprise funds include the Public Housing Fund, Sewer Fund and Golf Fund. These enterprise funds are reported as business-type activities in the government-wide financial statements.

Fiduciary Funds - Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the County's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Required Supplementary Information (RSI) - This MD&A is a RSI component.

Notes to the Financial Statements - The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements are the last section of the basic financial statements.

Other Supplementary Information (OSI) - This section follows the basic financial statements and includes a combining balance sheet and combining statement of revenues, expenditures, and changes in fund balances which displays the individual fund data of the 18 other non-major governmental funds. These non-major funds are the Highway, Liquor, Beautification, Criminal Asset Forfeiture, Special State, Solid Waste, Plans and Permit Revolving, Section 8, State Grants, Parks and Playgrounds, Sewer Trust, Development, Bikeway CIP, Special State CIP, General CIP, Highway CIP, Grants CIP and Debt Service.

Also included as OSI are the budgetary comparison schedules for the following special revenue and enterprise funds: Highway, Liquor, Beautification, Criminal Asset Forfeiture, Solid Waste Disposal, Public Housing, Sewer, and Golf. Both original and final budget authorizations are included to compare changes to the original annual budget ordinance.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As allowed by GASB, the County has not restated prior year revenues or expenses for purposes of providing comparative data analysis for the MD&A. In the future years, comparative analysis of government-wide data will be presented.

By far the largest portion of the County's net assets (92 percent) is related to its investment in capital assets less any related debt used to acquire those assets that is still outstanding. The County uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending.

The County's restricted net assets category represents four percent of the net assets. These restrictions of net assets are imposed by enabling legislation or parties outside the government (such as creditors, grantors, contributors, laws or regulations of other governments).

The following tables summarize the County's government-wide financial statements as of June 30, 2003.

Statement of Net Assets (condensed) as of June 30, 2003

ANALYSIS OF GOVERNMENTAL FUNDS

As noted earlier, the County uses fund accounting to ensure and demonstrate compliance with financerelated legal requirements.

The focus of the County's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the County's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the County's governmental funds reported combined ending fund balances of \$54.3 million, a decrease of \$2.4 million in comparison with the prior year. Approximately 34 percent (\$18.4 million) of this total amount constitutes unreserved fund balance, which is available for spending at the government's discretion. The remainder of fund balance (\$35.9 million) is reserved to indicate that it is not available for new spending because it has already been committed to liquidate contracts and purchase orders of the prior period.

General Fund - The General Fund is the chief operating fund of the County. At the end of the current fiscal year, unreserved-undesignated fund balance of the General Fund was \$9.8 million, while the total fund balance reached \$14.4 million. Unreserved-undesignated fund balance represents 20 percent of its expenditures.

The net change in the fund balance for the General Fund was an increase of \$2.0 million during the current fiscal year. The fluctuation of the fund balance is not unusual as the fund balance for General Fund was at \$12 million in fiscal year ending 2002, \$14 million in fiscal year ending 2001 and \$11 million for fiscal year ending 2000. Key factors for this year's increase are discussed below.

Real property taxes are the most significant revenue source for the County. This fiscal year's collection of \$42.3 million represents an increase of \$4.2 million over prior year. The increase in real property taxes can be attributed to the increase in the County's net assessed value for land and buildings of approximately \$600 million and \$100 million, respectively, in comparison to the prior fiscal year. Even with the lowering of the real property tax rates for all classes of property the County realized a net increase of 11 percent from real property tax revenues. Another significant revenue increase in the General Fund related to the transient accommodations tax (TAT) of approximately \$1.0 million due to higher hotel occupancy levels experienced in the current fiscal year. These increases were offset by interest earnings decreasing by approximately \$1.0 million due to the low investment interest rates experienced in the current fiscal year.

Total expenditures in the General Fund amounted to \$49.0 million, which represents an increase of approximately \$1.4 million over the previous year. Salaries and wages expenditures of \$29.1 million reflect an increase of approximately \$1.0 million (3.3 percent increase) from the prior year and accounts for 71 percent of the total increase in expenditures.

The public safety functional category of expenditures, approximately \$20.1 million, shows the largest increase of all General Fund expenditure categories, approximately \$1.3 million, which represents an increase of 6 percent over prior year. Approximately \$700,000 of the increase is salary related. Training fire and police personnel specifically for terrorism and biological attacks has had a significant effect on the increase in salary expenditures.

Housing and Community Development Revolving Fund – The Housing and Community Development Revolving Fund accounts for home rehabilitation loans made to qualified individuals under the U.S. Housing and Urban Development's (HUD's) Community Development Block Grants rehabilitation program. Fund balance increased approximately \$500,000 over prior year. The increase is primarily due to increases in intergovernmental revenues. In the prior year, the County recorded an adjustment to reduce intergovernmental revenues based on a finding by the State. Current year intergovernmental revenues reflect normal amounts from operations.

Federal Grants Fund - The Federal Grants Fund accounts for expenditures of federal grants. The County recorded expenditures of approximately \$7.7 million which represents an increase of \$1.2 million over prior year. The increase is due to an increase in federal grant funding obtained during the current year. Since revenues and expenditures are equal, there was no effect on fund balance.

Bond Fund - The Bond Fund accounts for the cost of constructing County capital improvements financed by general obligation bond proceeds. In the current year, the Bond Fund recognized approximately \$5.6 million in capital expenditures representing a decrease of approximately \$6.6 million from prior year. In the prior year, the County had more construction activity compared to the current year (e.g., ADA compliance projects and Police/Prosecuting Attorney/EOC facility). Since there was no new general obligations issued, there was no other financing sources to offset expenditures, therefore fund balance also experienced a decrease of approximately \$5.6 million.

Highway Fund - The Highway Fund, which is funded by fuel taxes (\$3.8 million), franchise taxes (\$2.3 million) and motor vehicle weight taxes (\$3.2 million, classified as licenses and permits) collectively, made up 9.5 percent (\$9.3 million) of the revenues in the governmental funds. Total Highway Fund revenues increased by \$500,000 or 6 percent over prior year's revenues (\$8.8 million). Increases in motor vehicle weight tax revenues are the result of approximately 1,000 additional registered vehicles on Kauai compared to prior year.

Highway Fund expenditures increased by \$200,000 or 3 percent to \$7.1 million. During the year, \$1.9 million was transferred to the Highway CIP Fund to repair and reconstruct Kauai's aging roads. Revenues still exceeded expenditures and operating transfers by \$500,000, increasing fund balance to \$2.6 million.

Solid Waste Fund – The Solid Waste Fund accounts for the revenues and expenditures related to the County's landfills. Current year revenues of \$2.6 million from tipping fees and commercial disposal fees represent an increase of approximately \$300,000 or 13 percent over prior year revenues. These revenues are expected to offset future landfill maintenance, closure and post-closure costs. Total expenditures were approximately \$6.3 million which represents an increase of \$100,000 over prior year and is approximately \$1.0 million less than budgeted primarily due to the County not implementing certain programs.

Unbudgeted Funds - The County's unbudgeted funds which include Section 8, Plans and Permit Revolving, Federal Grants, Special State Grant, Capital Projects Grants, and State Grants funds has no effect on the financial position of the County because expenditures are funded by federal or state governments. Usually the revenues equal the expenditures because revenue is recognized as the related expenditure is made. The

total expenditures for all unbudgeted funds were \$25.6 million compared to \$23.7 million last fiscal year, an increase of \$1.9 million. Most of the increase came from the HUD Section 8 program. HUD has increased the funds available to subsidize rental housing for lower income families by approximately \$1.2 million over prior year.

GENERAL FUND BUDGETARY HIGHLIGHTS

There were no significant changes in the original and final amended budgets. The General Fund collected 99 percent of the budgeted revenues. The larger variances in General Fund expenditures came from health fund costs and police and fire salaries. Federal and state grants reimburse the General Fund for funded positions that reduce the salary and fringe cost normally charged to the General Fund. Normal health fund cost increases did not materialize as budgeted, which resulted in a positive variance of \$1.7 million. The General Fund budgeted \$5.2 million for subsidies to the Solid Waste Fund but required only \$3.6 million. The increase in Solid Waste Fund revenues, combined with expenditures less than budgeted reduced the General Fund's contribution requirement. Other large budgetary variances occurred in the Housing and Community Development Revolving Fund specifically related to the Kalepa Village housing expansion. The \$1.2 million budgeted for improvements to the Kalepa Village housing expansion was not spent during the year and needs to be re-appropriated next year.

Capital Assets - The County's investment in capital assets for its governmental and business-type activities as of June 30, 2003, amounted to \$483 million (net of accumulated depreciation), an increase of approximately \$20 million. This investment in capital assets includes land, buildings and improvements, machinery and equipment, infrastructure (roadways and systems, bridges and sewer and golf systems) and construction-in-progress. The increase in infrastructure assets (\$5.8 million) and land (\$3.0 million) includes Ulu Maika, Unahe, and Huali streets, dedicated to the County as a requirement for development. Major increases in construction in progress relates to expenditures for the new Police/Prosecuting Attorney/EOC facility, resurfacing Kekeha access roads, Lydgate Bike and Pedestrian path and Kaana street construction. The completion of the new Kauai Bus baseyard construction project accounts for the increase in buildings and improvements. Most capital projects pass through construction-in-progress before being capitalized because

of the multi-year completion process. The new integrated assessment system for real property, 15 new police vehicles and a new fire truck makes up the addition to the machinery and equipment category of the capital assets.

Additional information on the County's capital assets can be found in Note 7 in the notes to the basic financial statements.

Long-Term Debt - At the end of the current fiscal year, the County's long-term debt, excluding the Department, consisted of the following: total bonded debt of approximately \$55.0 million, loans payable of approximately \$10.5 million and capital lease obligations of approximately \$1.8 million. Of the total bonded debt, approximately \$1.4 million represents revenue bonds secured solely by specified revenue resources. The County did not issue any new debt in the current fiscal year.

The County maintains an "A" rating from both Standard & Poor's and Fitch Rating and an "A1" rating from Moody's Investors Service for general obligation debt. An investment grade rating of this type indicates a strong capacity to pay off debt.

The State Constitution limits the amount of general obligation debt a governmental entity may issue to 15 percent of the total assessed value of its real property. The current debt limitation for the County is approximately \$978 million. As of June 30, 2003 the County's current outstanding debt of \$51.6 million represents approximately six percent of our debt limitation.

Additional information on the County's long-term debt can be found in Note 10 in the notes to the basic financial statements.

Requests for Information

This financial report is designed to provide a general overview of the County's finances. Questions concerning any information provided in this report or requests for additional information should be addressed to the Director of Finance, 4444 Rice Street, Suite 280, Lihue, Hawaii 96866.

(THIS PAGE INTENTIONALLY LEFT BLANK.)

Governmental Fund Financial Statements

MAJOR FUNDS

General Fund

The General Fund accounts for all financial resources traditionally associated with government which are not required legally, or by sound financial management, to be accounted for in another fund.

Special Revenue Funds

Housing and Community Development Revolving Fund

Accounts for home rehabilitation loans made to qualified individuals under the Department of Housing and Urban Development's Community Development Block Grants rehabilitation loan program. Monies collected are to be used to finance other eligible Community Development Block Grant projects.

Federal Grants Fund

Accounts for expenditures of federal grants.

Capital Projects Fund

Bond Fund

Accounts for the cost of constructing County capital improvements financed by general obligation bond proceeds.

NONMAJOR FUNDS

Debt Service Fund

Debt service funds are used to account for the accumulation of resources for, and the payment of, debt principal, interest and related costs.

Special Revenue Funds

Highway Fund

Accounts for the costs of maintaining the County's highways and streets. Financing is provided primarily by fuel, motor vehicle weight and public utility franchise taxes, and licenses and permits.

Liquor Fund

Accounts for costs of operating the County's Liquor Department. Financing is provided by liquor licenses and permits.

Beautification Fund

Accumulates monies for the beautification of highways and streets. Defrays the cost of disposing of abandoned vehicles. Financing is provided by motor vehicle registration fees.

Criminal Assets Forfeiture Fund

Accounts for monies received by the Kauai Police Department under the Comprehensive Crime Control Act of 1984 and accumulated interest thereon. The monies are to be expended by the Kauai Police Department for law enforcement purposes.

Special State Grant Fund

Accounts for monies from the State of Hawaii grants-in-aid to counties.

Solid Waste Disposal Fund

Accounts for costs of operating the County's solid waste disposal system. Financing is provided by charges to commercial users for solid waste disposal services and General Fund contributions for other users.

Plans and Permits Revolving Fund

Accounts for monies collected from new permits and penalties.

Section 8 Fund

Accounts for a contract with the federal government pursuant to Section 8 of the Housing and Community Development Act of 1974. Funds are to be expended for housing assistance payments for lower-income families and for administrative costs.

Capital Projects Funds

State Grants Fund

Accounts for expenditures of state grants.

Parks and Playgrounds Capital Improvement Fund

Accounts for the cost of developing County parks and playgrounds financed by assessments to developers of residential projects.

Sewer Trust Fund

Accounts for the costs of expanding the County's sewer system financed by assessments to developers of subdivisions. Construction of the sewer system improvements is financed by general obligation debt that covers multiple public improvements. Repayment of the debt applicable to the sewer system will be made from General Fund sources. Accordingly, all sewer trust fund capital improvements are accounted for in the Capital Projects Fund and recorded as contributed capital in the Sewer Enterprise Fund upon completion.

Development Capital Improvement Fund

Accounts for capital improvements financed by assessments to developers of residential, hotel, commercial or industrial projects.

Bikeway Capital Improvement Fund

Accumulates monies for the construction and maintenance of bikeways and related activities financed by bicycle license fees.

Special State Capital Improvement Fund

Accounts for the cost of capital projects financed by State of Hawaii grants-in-aid to counties.

General Capital Improvement Fund

Accounts for costs of projects financed by the General Fund.

Highway Capital Improvement Fund

Accounts for the costs of projects financed by the Highway Fund.

Grants Capital Improvement Fund

Accounts for the costs of constructing County capital improvements financed by federal and state grants.

The notes to the basic financial statements are an integral part of this statement

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances - Governmental Funds To the Statement of Activities For the Year Ended June 30, 2003

Net change in fund balances-total governmental funds		\$ (2,456,627)
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation in the current period.		13,024,702
An allowance for uncollectible real property taxes reduced the tax revenue in the statement of net assets. This transaction was not applied in the governmental		iojonaji on
funds.		(238,124)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds:	2	
Contribution of infrastructure assets Revenues earned during the year but collected after year-end	8,775,168 957,419	
Total revenues that do not provide current financial resources		9,732,587
Borrowings provide current financial resources to governmental funds; however, issuing debt increases long-term liabilities in the statement of net assets. This amount represents proceeds from capital leases in the current period.		(1,181,751)
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. In the current year, these principal payments amounted to:		
Bond principal retirement Capital lease payments	3,490,000 862,807	
Total long-term debt repayment Some items reported in the statement of activities do not involve current financial resources and therefore are not reported as expenditures in governmental funds. These activities are:		4,352,807
Increase in compensated absences Increase in claims and judgements Increase in landfill closure / postclosure care costs Net decrease in accrued interest payable	(884,624) (998,312) (446,732) 74,223	
Net additional expenditures Change in net assets - governmental activities		\$ (2,255,445) 20,978,149

(THIS PAGE INTENTIONALLY LEFT BLANK.)

Proprietary Fund Financial Statements

MAJOR FUNDS

Public Housing Fund

Accounts for the acquisition, development, sale and rental of low-income housing. Financing is provided by low-income housing sales and operating contributions.

Sewer Fund

Accounts for the costs of operating the County's sewer system. Financing is provided by charges to users for sewer services.

NONMAJOR FUND

Golf Fund

Accounts for the cost of operating the County's golf course. Financing is provided primarily by golf fees, rents and concessions.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Financial Reporting Entity

The County of Kauai (County) is a municipal corporation governed by an elected mayor and a seven-member council. The County operates under a County Charter, which was originally adopted in 1969 and last amended in 2002.

The accompanying financial statements present the operations of the County, as primary government, as well as its discretely presented component unit, the Department of Water. The County's operations are organized by the following general functions: general government, public safety, public works, highways and streets, sanitation, culture and recreation, public welfare, housing and sewer or other enterprises. For financial reporting purposes, the County includes all funds, account groups, agencies, boards, commissions and authorities that are fiscally dependent upon the County and for which the County is financially accountable.

State of Hawaii (State) agencies assume responsibility for several major functions often performed by local governments; including education, welfare, health and judiciary functions. State agencies are not fiscally dependent on the County and therefore, are not included in these financial statements. There are no separate city, county or township governments nor any school district, special districts, authorities or public corporations with overlapping authority presented in the accompanying financial statements.

The financial statements of the County have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the standard-setting body for governmental accounting and financial reporting. Pronouncements of the Financial Accounting Standards Board (FASB) issued after November 30, 1989 are not applied in the preparation of the financial statements of the proprietary fund types in accordance with an election made by the County under GASB Statement No. 20. The GASB periodically updates its codification of the existing Governmental Accounting and Financial Reporting Standards, which, along with subsequent GASB pronouncements (Statements and Interpretations), constitutes GAAP for governmental units. The more significant of these accounting policies are described below.

In June 1999, the GASB issued Statement No. 34 "Basic Financial Statements and Management Discussion and Analysis for State and Local Governments." This Statement provides for the most significant change in financial reporting in over twenty years and requires implementation starting with fiscal years ending after June 15, 2002. As a part of this Statement, there is a new reporting requirement regarding a local government's infrastructure (streets, bridges, traffic signals, etc.) with required implementation for fiscal years ending after June 15, 2006. The County elected to implement the basic model required by GASB Statement No. 34, including infrastructure reporting for the year ended June 30, 2003.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

In June 2001, GASB issued Statement No. 38, "Certain Financial Statement Note Disclosures", which in part, addressed the need to reevaluate certain existing disclosure requirements in the context of the reporting model in Statement No. 34. The County implemented Statement No. 38 in conjunction with Statement No. 34 for the year ended June 30, 2003.

Discretely Presented Component Unit

The component unit column in the financial statements includes the financial data of the County's discretely presented component unit, the Department of Water (Department), which is a semi-autonomous proprietary agency of the County. It is reported in a separate column to emphasize that it is legally separate from the County.

A majority of the members of the Department, the governing body, are appointed by the Mayor and confirmed by the County Council. The Department is granted corporate powers by the County Charter. The County does not have the authority to modify or approve the Department's budgets. Revenue bonds and loans payable of the Department are general obligations of the County. As the County would be obligated to repay these bonds in the event of default by the Department, the County is financially accountable for the debts of the Department. Complete financial statements of the Department may be obtained from the Department of Water, County of Kauai, 4398 Pua Loke Street, Lihue, Kauai, Hawaii 96766.

Government-wide and Fund Financial Statements

The basic financial statements include both government-wide and fund financial statements. The new reporting model under Statement No. 34 focuses on the County as a whole in the government-wide financial statements and major individual funds in the fund financial statements. Both types of statements categorize primary activities as governmental or business-type. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from the legally separate component unit for which the primary government is financially accountable.

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component unit. For the most part, the effect of interfund activity has been removed from these statements. In the statement of net assets, both the governmental and business-type activities columns (a) are presented on a consolidated basis by column, (b) and are reflected, on a full accrual, economic resource basis, which incorporates long-term assets and receivables as well as long-term debt and obligations.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

The statement of activities reflects the direct expenses of the functional category or segment, which are supported by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Measurable means the amounts are determinable. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Significant revenues that are susceptible to accrual are as follows:

- Property taxes collected within sixty days after year-end
- Rents and concessions
- Federal and State financial assistance (to the extent that related expenditures that are eligible for reimbursements have been incurred)
- Interest
- Revenues collected by the State on behalf of the County, such as fuel taxes and transient accommodation taxes

All other revenue items are considered to be measurable and available only when cash is received.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Intergovernmental revenues are susceptible to accrual based on the compliance, legal and contractual requirements of the individual programs. There are essentially two types of these revenues. For one type of revenues, monies must be expended for a specific purpose or project and revenues are recognized to the extent of such expenditures. Revenues of this type are deferred for monies received in advance of expenditures and accrued for expenditures in advance of monies received. For the other type of revenues, monies are virtually unrestricted as to purpose of the expenditure. These resources are reflected as revenues at the time of receipt, or earlier if the susceptible to accrual criteria are met.

Proprietary funds are reported using the accrual basis of accounting. Revenues are recognized when earned, and expenses are recognized as incurred. All proprietary funds follow applicable GASB guidance or FASB Statements and Interpretations, Accounting Principles Board Opinions and Accounting Research Bulletins issued on or before November 30, 1989 that do no conflict with, or contradict, GASB pronouncements.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the County's enterprise funds are charges to customers for services. Operating expenses for enterprise funds include the cost of services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The County's fiduciary funds are presented in the fund financial statement by type. Since by definition these assets are being held for the benefit of a third party and cannot be used to address activities or obligations of the government, these funds are not incorporated into the government-wide statements.

Fund Types

The financial transactions of the County are recorded in individual funds. Each fund is accounted for by providing a separate set of self-balancing accounts that comprises its assets, liabilities, reserves, fund balances, revenues and expenditures/expenses. There are certain minimum criteria (percentage of the assets, liabilities, revenues, or expenditures/expenses of either fund category or the governmental and enterprise combined) for the determination of major funds. The non-major funds are combined in a column in the fund financial statement and detailed in the combining section.

The County has the following fund types:

Governmental Fund Types

The focus of the governmental fund measurement (in the fund financial statements) is upon determination of financial position and changes in financial position (sources, uses and balances of financial resources).

The County's governmental fund types are as follows:

General Fund - The general fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Special Revenue Fund – Special revenue funds are used to account for the proceeds of specific revenue sources (other than special assessments, expendable trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

Debt Service Fund - Debt service funds are used to account for the accumulation of resources for, and the payment of, debt principal, interest and related costs.

Capital Projects Fund – Capital project funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds).

Proprietary Funds

The focus of proprietary fund measurement is upon determination of operating income, changes in net assets, financial position and cash flows. The generally accepted accounting principles applicable are those similar to businesses in the private sector. The County maintains three proprietary enterprise funds as well as its discretely presented component unit under the following criteria:

Enterprise Funds – Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises (a) where the intent of the governing body is that the costs (i.e., expenses including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Fiduciary Funds

The County maintains the following fiduciary fund type:

Agency Funds - Agency funds are custodial in nature and are used to receive and disburse funds for an entity/individual, which is not part of the County. Agency funds function as a clearing account and do not measure results of operations.

Cash and Cash Equivalents

The County's cash and cash equivalents include cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. Cash on deposit with financial institutions is collateralized in accordance with State statutes.

Investments

The County generally invests in certificates of deposit, repurchase agreements, government agency securities (i.e. Federal Home Loan Bank notes and bonds, Federal Home Loan Mortgage Corporation bonds, and Federal National Mortgage Association notes and bonds) with federally insured financial institutions and mutual funds. Investments are recorded at fair value. The County's investment vehicles are consistent with the investment guidelines contained in the Hawaii Revised Statutes (HRS).

HRS authorize the County to invest, with certain restrictions, in obligations of the State of Hawaii, the United States or agencies of the United States, time certificates of deposit and repurchase agreements with federally insured banks and savings and loan associations authorized to do business in the State of Hawaii.

Real Property Taxes

Real property taxes are assessed and billed annually. The County's real property taxes, which are levied on July 1 and billed on July 20 of each year, are based on assessed valuations as of the previous January 1. Real property taxes are due in two equal installments on August 20 and February 20. Accordingly, all real property taxes receivable as of June 30 are delinquent and are reported as deferred revenue for amounts not collected within 60 days after the fiscal year end in the fund financial statements. A lien for real property taxes attaches as of July 1 of each year.

Receivables

Loans receivable consist of housing rehabilitation loans made with federal funds by the Housing and Community Development Revolving Fund (HCDRF), a special revenue fund. The loans are partially offset by a deferred revenue account. Revenue is recorded and included in intergovernmental revenues when the loans made with federal funds are collected.

Receivables of the Department of Water are recorded as revenue when earned, including charges for services rendered but not billed, net of allowance for doubtful accounts approximating \$760,000.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Receivables for federal and state financial assistance are recorded as revenue, in all fund types, as related expenditures are made.

Real Property Held for Sale

Inventory of real property held for sale consists of dwelling units available for sale and is stated at the lower of cost or net realizable value.

Materials and Supplies

Materials and supplies are stated at the lower of average cost (which approximates the first-in, first-out method) or market.

Restricted Assets

The County sets aside certain resources for the repayment of enterprise fund revenue bonds. These resources are classified as restricted assets on the statement of net assets and balance sheet because their use is limited by bond covenants. The Department sets aside certain resources to fund future capital improvements of the water supply system.

When both restricted and unrestricted resources are available for use, it is the County's policy to use restricted funds first, then unrestricted resources as they are needed.

Capital Assets

Capital assets, which include property, plant, equipment and infrastructure assets (e.g., roads, bridges, sidewalks and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. The County defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life of more than one year. The Department defines capital assets as assets with an initial, individual cost of more than \$1,000. Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend the life of the asset are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business type activities is included as part of the capitalized value of the asset constructed.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Depreciation on all assets is provided for on the straight-line basis over the following estimated useful lives:

Primary Government

Motor vehicles	3 to 15 years
Furniture and equipment	5 to 20 years
Buildings and improvements	20 to 50 years
Transmission and distribution	25 to 40 years
Infrastructure	30 to 60 years

Component Unit

Motor vehicles	5 to 10 years
Equipment and machinery	5 to 20 years
Buildings and improvements	40 to 50 years
Transmission and distribution equipment	18 to 40 years

Intrafund and Interfund Transactions

Interfund receivables and payables are reported in each fund. Transfers of financial resources between agencies and activities within the same fund, which are recorded as revenues by the transferee and expenditures by the transferor, have been eliminated. Transactions that represent reimbursements to a fund for expenditures or expense initially made from it that are properly applicable to another fund are recorded as expenditures or expenses in the reimbursing fund and as reductions of expenditures or expenses in the fund reimbursed.

Operating transfers include operating subsidies and authorized transfers from funds receiving revenues to funds that will expend those resources.

Interfund receivables and payables represent borrowing arrangements between governmental fund types that are current interfund loans and expected to be paid off within one year. Advances to and from other funds represent borrowing arrangements between nongovernmental fund types that are noncurrent. All other outstanding current balances between funds are reported as "due to/from other funds."

Net Assets

Net assets comprise the various net earnings (losses) from operating and nonoperating revenues, expenses, operating transfers and contributed capital. Net assets are classified in the following three components: invested in capital assets, net of related debt; restricted; and unrestricted net assets. Invested in capital assets, net of related debt, consists of capital assets, net of accumulated depreciation and outstanding debt attributable to the acquisition, construction or improvement of those assets. Debt related to unspent proceeds or other restricted cash and investments at year-end are not included in the calculation of the amount invested in capital assets, net of related debt. Restricted net assets consists of

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

net assets for which constraints are placed thereon by external parties, such as lenders, grantors, contributors, laws, regulations and enabling legislation, including self-imposed legal mandates. Unrestricted net assets consist of all other net assets not included in the above categories.

Compensated Absences

Vacation leave and other compensated absences are accrued as a liability as the benefits are earned if the leave is attributable to past service and it is probable that the employees will be compensated for the benefits through paid time off or some other means, such as cash payments at termination or retirement.

Vacation pay is recorded as an expenditure in the governmental fund types when the amounts, if any, are expected to be liquidated with expendable available resources. All vacation pay is accrued when incurred in the government-wide and proprietary fund financial statements.

Sick Leave

Permanent full-time County employees accrue sick leave. Sick leave is calculated based upon current compensation levels. Sick pay can be taken only in the event of illness and is not convertible to pay upon termination of employment. Sick pay is recorded when leave is taken because it does not vest when earned. As a result, no liability for sick pay is recorded in the accompanying financial statements. Accumulated sick leave (including the Department of Water) was approximately \$24.6 million at June 30, 2003.

Capital Leases

Leases that substantially transfer all of the risks and benefits of ownership are accounted for as capital leases. Capital leases are included in capital assets, and, where appropriate, are amortized over the shorter of their economic useful lives or lease terms. The related capital lease obligations are included in long-term liabilities in the government-wide financial statements.

Facility Reserve Charges

The Department of Water assesses a fee to commercial and residential developers based upon the number and size of water meters installed at the respective projects which, together with interest earned thereon, provides for the funding of system capital improvements which are included as reserved for utility plant construction in the statement of net assets. Expenditures of these monies are restricted by the Department of Water ordinances to water supply system capital improvements.

Use of Estimates

The preparation of the basic financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues, expenses/expenditures, and other financing sources and uses during the reported period. Actual results could differ from those estimates.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Fund equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

2. Restated Beginning Net Assets

The implementation of GASB Statement No. 34 resulted in the following adjustments to the County's June 30, 2002 net assets for the governmental activities:

		Governmental Activities	
Net Assets:			
Fund balances at June 30, 2002, as previously reported by governmental			
fund type:			
General	\$	12,382,205	
Special revenue		17,611,251	
Debt service		3,273,282	
Capital projects		23,481,039	
Total fund balances at June 30, 2002, as previously reported		56,747,777	
GASB Statement No. 34 adjustments:			
Addition of:			
Net capital assets		414,114,331	
Long-term liabilities		(78,673,174)	
Accrued interest		(1,239,007)	
		334,202,150	
Net Assets as of June 30, 2002, as restated	\$	390,949,927	

3. Budgets and Budgetary Accounting

Annual appropriated budgets are adopted for the General Fund and the following special revenue funds and enterprise funds:

Special Revenue Funds

Enterprise Funds

Highway Fund Liquor Fund Sewer Fund Golf Fund

Beautification Fund

Public Housing Fund

Criminal Asset Forfeiture Fund Solid Waste Disposal Fund

Housing and Community Development Revolving Fund

Budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America except that encumbrances are treated as budgetary expenditures in the year the commitments are made and exclude claims and judgments and landfill closure and post closure liabilities. Annual appropriations, except enterprise funds, lapse at fiscal year end. Project ordinances are adopted for capital projects funds.

The County uses the following procedures in establishing the budgetary data reflected in the financial statements:

- On or before March 15, the Mayor submits a proposed operating and capital projects budget for the
 year commencing the following July 1 to the County Council. The operating and capital project
 budgets include proposed expenditures and the means of financing them.
- Public hearings are conducted to obtain citizen comments. The County Council may amend the Mayor's budget.
- On or before June 7 of the fiscal year currently ending, the County Council legally enacts the budget through passage of a budget ordinance.
- Amendments to the enacted budget ordinances may be proposed by the Mayor and enacted by the County Council (under the same procedures prescribed for the enactment of the annual budget ordinance), provided that no amendment increases the aggregate of authorized expenditures to an amount greater than the estimate of available financial resources for the fiscal year.
- The Mayor is authorized to transfer appropriations between programs within a department without County Council approval; however, any transfer that alters the total expenditures of any department must be approved by the County Council.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Formal budgetary integration is employed in the annual operating budgets as a management control device during the year for the General Fund and Special Revenue Funds (except for the Section 8, Plans and Permit Revolving Fund, Special State, Federal Grants and State Grants Fund). Accordingly, budget figures are included in the respective Statement/Schedules of Revenues, Expenditures and Changes in Fund Balance – Budget, and Actual. The capital projects funds budgets were adopted on a project basis and, accordingly, are not included in this presentation.

Formal budgetary integration is also employed for the Sewer, Golf and Public Housing Funds. Accordingly, budget figures are included as additional information in the respective Schedules of Revenues, Expenditures and Changes in Fund Equity - Budget and Actual for these funds.

Formal budgetary integration is not employed for the Debt Service Fund, agency funds and certain special revenue funds, as noted above. Budgetary control for these funds are achieved through bond indentures, contractual or grant provisions, projects oversight and legislation.

Flexible budgeting is employed for the Department of Water. Expenditures may not exceed appropriations at the departmental level. Individual fund budgetary comparisons (by object code, by year of appropriation) are reported in separate budgetary reports, which can be obtained from the County's Director of Finance.

The final budget figures presented include all amendments during the year. Amendments to the budget ordinance for the fiscal year were made in compliance with the procedures described above. Several budget amendments were made during the year.

Encumbrance accounting is employed as an extension of formal budgetary integration in the General Fund and budgeted special revenue funds. Capital projects funds also employ encumbrance accounting to reserve for construction contracts. Actual expenditures on a budgetary basis include current year reserves for encumbrances and exclude payments on prior year encumbrances. Encumbrances outstanding at year-end are reported as reservations of fund balances and do not constitute expenditures or liabilities because the commitments will be honored during the subsequent year. Budgeted deficiencies are funded by the estimated unreserved-undesignated fund balances as of June 30, 2002.

4. Budget to GAAP Reconciliation

The County's budget is prepared differently from GAAP. Therefore, the Statement of Revenues, Expenditures and Changes in Fund Balances - Budget and Actual - General Fund and Housing and Community Development Revolving Fund is presented on the budgetary basis, using budgetary expenditure categories.

The following is a reconciliation of the differences between the budgetary basis and GAAP basis for the excess of revenues and other sources over expenditures and other uses for the aforementioned financial statements:

	General Fund		Housing and Community Development Revolving Fund	
GAAP basis excess of revenues and other financing sources				
over expenditures and other financing uses	\$	2,015,696	\$	464,073
Increase in provision for self-insured claims and judgments		(681,483)		-
Encumbrances of budgeted funds:		. ,		
Current year		(2,489,476)		(23,620)
Prior year		2,330,958		238,821
Encumbrances lapsed		(575,203)		(12)
Non-GAAP budgetary basis excess of revenues and other financing sources over expenditures and other financing				
uses	\$	600,492	\$	679,262

5. Cash and Investments

The County maintains a cash and investment pool that is used by all funds including the component unit. Each of the funds' and component unit's portion of this pool are displayed in the accompanying financial statements.

Cash and Cash Equivalents

The County's demand and time certificates of deposits, including those of its fiduciary funds and component unit are categorized below to give an indication of the level of risk assumed at June 30, 2003. Category 1 includes bank balances, which are fully insured or collateralized with securities held by the County or its agent in the County's name. Category 2 includes bank balances that are collateralized with securities held by the pledging financial institution's trust department or agent in the County's name. Category 3 includes uninsured and uncollateralized cash.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

The following table presents the County's and Department's cash at June 30, 2003, including restricted cash approximating \$223,000 and \$1,800,000 respectively.

		Category		Bank	Carrying		
	1	2	3	Balances	Amount		
Primary government	\$ 17,150,573	\$ -	\$ -	\$ 17,150,573	\$ 16,737,278		
Component unit	5,735,834	-		5,735,834	6,006,401		
Total	\$ 22,886,407	\$ -	<u> </u>	\$ 22,886,407	\$ 22,743,679		
Fiduciary funds	\$ 1,310,445	\$ -	\$ -	\$ 1,310,445	\$ 1,310,445		

Approximately \$500,000 of total bank balances of deposits was covered by federal depository insurance.

Investments

The County pools certain funds for investment purposes. The following table presents the County's investments at June 30, 2003, including the restricted investments of its component unit approximating \$9.2 million, and provide information about the credit and market risks associated with the County's investments. Category 1 includes investments that are insured or registered, or securities held by the County or its agent in the County's name. Category 2 includes investments which are uninsured and unregistered, with securities held by the counterparty's trust department or agent in the County's name. Category 3 includes investments which are uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent but not in the County's name.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

8. INTERFUND RECEIVABLES/PAYABLES

The due from/to other funds consists of the following as of June 30, 2003:

Receivable Fund	Payable Fund	 Amount		
Due from/to Other Funds				
Nonmajor governmental funds	General Fund	\$ 3,797,974		
General	Federal Grants Fund	1,691,756		
General	Nonmajor governmental funds	 6,927,004		
		\$ 12,416,734		

There are no interfund balances that are not expected to be repaid by June 30, 2004.

Operating Transfers

Transfers for the fiscal year ended June 30, 2003 consisted of the following:

			Tra	unsfer out:		
	G	eneral Fund		Nonmajor vernmental Funds	***************************************	Total
Transfer in: General Fund Nonmajor governmental funds	\$	- 10,371,213	\$	903,000 1,500,000	\$	903,000 11,871,213
Proprietary funds	***************************************	189,138		**		189,138
	\$	10,560,351	\$	2,403,000	\$	12,963,351

There are no significant transfers that either do not occur on a routine basis or are inconsistent with the fund making the transfer.

9. Capital Leases

The County leases machinery and equipment under non-cancellable leases expiring at various dates through November 2009 which meet the criteria for capitalization. These capital leases are financed from general fund resources.

The estimated value of the leased machinery and equipment at the inception of the leases net of accumulated depreciation, amounting to \$4,527,050 and \$1,712,378, respectively, and the related present value of the remaining obligations under the capital leases amounting to \$1,788,990 at June 30, 2003 are included in the capital assets and long-term liabilities, respectively.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

The future minimum obligations under capital leases at June 30, 2003 are as follows:

Year Ending June 30,]	Principal		Interest	Total		
2004	\$	697,000	\$	62,000	\$	759,000	
2005		517,000		34,000		551,000	
2006		233,000		19,000		252,000	
2007		158,000		11,000		169,000	
2008		90,000		6,000		96,000	
2009 - 2013		93,990		3,536		97,526	
	\$	1,788,990	\$	135,536	\$	1,924,526	

10. Long-Term Debt

Changes in long-term liabilities

General Obligation Bonds

The County issues general obligation bonds to provide funds for the acquisition and construction of major capital facilities. These bonds have been issued by the County for both primary government and component unit activities. General obligation bonds payable reported on the government-wide statement of net assets at June 30, 2003 are comprised of the following individual issues:

Governmental Activities General obligation bonds, 2001 Series A, original amount \$33,635,000, due in annual installments of \$2,343,868 to \$2,413,750 from August 2001 through August 2024, interest payment semi-annually from 4% to 5.625%. 31,760,000 General obligation taxable bonds, 2000 Series B, original amount \$2,820,000, due in annual installments of \$115,000 to \$325,000 from August 2001 through August 2014, interest payment semi-annually from 8% to 8.10%. 2,580,000 General obligation refunding bonds, 1997 Series A, original amount \$3,655,000, due in annual installments of \$450,000 to \$595,000 through August 2004, interest payment semi-annually from 4% to 4.55%. 1,160,000 General obligation refunding bonds, 1994 Series A, original amount \$8,225,000, due in annual installments of \$45,000 to \$1,010,000 through February 2007, interest payment semi-annually from 3.75% to 5.7%. 3,735,000 General obligation refunding bonds, 1992 Series B and C, original amount \$20,120,000, due in annual installments of \$215,000 to \$1,790,000 through August 2010, interest payment semi-annually from 2.6% to 5.95%. 12,345,000 Total 51,580,000 **Business-type Activities** General obligation refunding bonds, 1997 Series B, original amount

Annual requirements to amortize primary government general obligation bonds payable as of June 30, 2003 are approximately as follows:

2,065,000

\$2,420,000, due in annual installments of \$90,000 to \$195,000 through August 2017, interest payment semi-annually from 4.05% to 5.25%.

General obligation bonds are direct obligations of the County. The County has pledged its full faith and credit. Additionally the Department has pledged to maintain and collect revenues sufficient to pay all operating costs and to pay the principal and interest on such bonds as they become due.

In prior years, the County and the Department defeased certain general obligation bonds by placing proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly the trust account assets and the liability for the defeased bonds are not included in the County's financial statements. At June 30, 2003, approximately \$24 million of primary government and \$5.5 million of Department general obligation bonds outstanding are considered defeased.

Revenue Bonds

Revenue bonds are direct obligations where the County pledges income derived from acquired or constructed assets to pay debt service.

At June 30, 2003, the long-term debt of the Public Housing Enterprise Fund comprised approximately \$1.4 million of 1992 series Rental Housing revenue bonds (original amount \$4.2 million) which are due in annual installments of \$95,000 to \$205,000 through April 2012. Interest on bonds are payable semi-annually at 7.25%.

Annual requirements to retire revenue bonds payable at June 30, 2003 are approximately as follows:

Year Ending June 30,	1	Principal	Interest	Total
2004	\$	120,000	\$ 103,000	\$ 223,000
2005		125,000	94,000	219,000

	\$	1,420,000	\$ 561,513	\$ 1,981,513

Loans Payable

Business-type Activities

The County has a construction loan agreement with the State of Hawaii totaling approximately \$2.6 million to fund a portion of the construction cost of the Kapaa wastewater treatment plant. Principal interest and loan fee payments are due quarterly in equal installments of \$46,272. Interest is accrued at 3.5% per annum. The loan was interest free during the period of construction. Principal balance at June 30, 2003 was \$1,758,436.

During fiscal 1995, the County entered into an additional construction loan agreement with the State of Hawaii totaling approximately \$700,000 to fund a change order related to the Kapaa wastewater treatment plant. Principal, interest and loan fee payments are due in semi-annual installments of \$23,925. Interest is accrued at 3.06% per annum. Principal balance at June 30, 2003 was \$449,228.

During fiscal 1993, the County entered into a construction loan agreement with the State of Hawaii totaling approximately \$14.1 million to fund a portion of the construction cost of the Lihue Wastewater, Phase IV project. A supplemental loan agreement reduced the principal amount to approximately \$13.4 million. Principal, interest and loan fee payments are due in quarterly installments of \$239,699. Interest is accrued from the date of the State-issued warrant (March 7, 1994) or check for each subsequent loan amount disbursed to the County at 3.78% per annum. Principal balance at June 30, 2003 was approximately \$8,216,933.

The construction loans are general obligation debt of the County that do not specify a dedicated revenue source to be used for repayment of the loans. The construction of each of these plants was completed during fiscal year 1997. The County determined that the funding source for repayment of these loans will be the Sewer Enterprise Fund.

Annual requirements to retire loans payable as of June 30, 2003 are approximately as follows:

Year Ending June 30,	F	Principal	Interest	 Total
2004	\$	828,000	\$ 364,000	\$ 1,192,000

	\$ 1,573,774	\$ 719,166	\$ 2,292,940

On April 15, 2002 the Department entered into a loan agreement with the DOH, State of Hawaii, for approximately \$1.1 million to provide capacity to pump potable water from the Kekaha Water System to the Waimea Water System under the Safe Water Drinking Act. The Department pays annual interest of 1.01% and a semi-annual loan fee of 1.625% of the outstanding principal balance. Under the terms of the loan agreement the Department incurs the cost related to the project and submits a request for reimbursement to the DOH. As of June 30, 2003, the Department has not received reimbursements from the DOH.

11. Employee Benefit Plans

Pension

Substantially all eligible employees of the County (including the Department of Water) are members of the Employees' Retirement System of the State of Hawaii (ERS), a cost-sharing multiple-employer defined benefit pension plan. The ERS provides retirement benefits as well as death and disability benefits. HRS Section 88 establishes or amends benefit provisions. Prior to June 30, 1984, the plan consisted of only a contributory option. In 1984, legislation was enacted to add a new noncontributory option for members of the ERS who are also covered under Social Security. Persons employed in positions not covered by Social Security are precluded from the noncontributory option. The noncontributory option provides for reduced benefits and covers most eligible employees hired after June 30, 1984. Employees hired before that date were allowed to continue under the contributory option or to elect the new contributory option and receive a refund of employee contributions. Both options provide for a monthly retirement allowance based on the employee's age, years of credited service, and average final compensation ("AFC"). The AFC is the average salary earned during the five highest paid years of service, including the vacation payment, if the employee became a member prior to January 1, 1971. The AFC for members hired on or after that date and prior to January 1, 2003 is based on the three highest paid years of service. excluding the vacation payment. Effective January 1, 2003, the AFC is the highest three calendar years or highest five calendar years plus lump sum vacation payment or, highest three school contract years, or last 36 credited months or last 60 credited months plus lump sum vacation payment. All benefits vest after five and ten years of credited service under the contributory and noncontributory options, respectively. Members, except police and firefighters, under the contributory option contribute at a rate of 7.8% of their salary. Members who are police officers or firefighters have a mandatory contribution rate of 12.2% of their salary.

The ERS provides basic pension benefits to individuals receiving pensions. Employer contributions to the ERS are comprised of normal cost plus level annual payments required to liquidate the unfunded accrued liability over the closed period ending June 30, 2029. The ERS uses the Entry Age Normal Actuarial Cost method to calculate the unfunded accrued liability.

The County's (including the Department of Water) payroll for employees covered by the plan for the year ended June 30, 2003 was approximately \$43.9 million. The total payroll for the County's employees for the year ended June 30, 2003 was approximately \$45.6 million. The County is required to contribute an actuarially determined amount to the ERS. Contributions made to the ERS by the County and employees for the year ended June 30, 2003 were approximately \$2.3 million and \$2.0 million, respectively. The County's actuarially determined contribution is 1.23% of the total current year actuarially determined contribution requirements for all employers. The contributions represented 5.3% and 4.6% of covered payroll, respectively. The County's contributions to ERS for fiscal years 2003, 2002 and 2001 of approximately \$2.3 million, \$3.3 million and \$95,300, respectively, were equal to the required contributions for each year.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

ERS issues a Comprehensive Annual Financial Report (CAFR) that includes financial statements and required supplementary information which may be obtained from the following address:

Employees' Retirement System of the State of Hawaii 201 Merchant Street, Suite 1400 Honolulu, Hawaii 96813

The following data was obtained from the disclosures contained in the CAFR for the year ended June 30, 2002:

Number of employers as of March 31, 2002 was

State	1
Counties	4
Total employers	<u>5</u>

Basis of Accounting - The financial statements of the ERS are prepared using the accrual basis of accounting. Employer and member contributions are recognized in the period in which the contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

Method Used to Value Investments - Plan investments are reported at fair value. Where appropriate, the fair value includes disposition costs. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments and real estate owned are based on independent appraisals and estimated values. Investments that do have an established market are reported at estimated fair value.

Post-Retirement Benefits

The County is required by the State to contribute to the Public Employees' Health Fund (the Fund), a state-wide program which provides health and group life insurance for all retired and active County employees, their dependents and their beneficiaries totaling approximately 3,900 participants, which included approximately 800 retirees and their dependents and beneficiaries. The State and other counties also participate in the Fund. The County's contribution is recorded as an expenditure when paid; the amount of the contribution is limited by State statute to the actual costs of benefit coverage. During fiscal year 2003, the County contributed approximately \$7.2 million to the Fund, which included contributions of approximately \$3.5 million for retirees and their dependents and beneficiaries.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Deferred Compensation Plan

The County has a deferred compensation plan (the Plan) created in accordance with Internal Revenue Code Section 457. The Plan, available to all employees, permits them to defer a portion of their salary until future years. Participation in the Plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency. The Small Business Job Protection Act of 1996 requires that all plan assets and income be placed in trust, custodial account or annuity contract for the exclusive benefit of the participants and their beneficiaries.

The County has met the requirements for the Small Business Job Protection Act of 1996 for its Internal Revenue Code Section 457 plan and in accordance with the criteria set forth in the GASB Statement No. 32, "Accounting and Financial Reporting Code Section 457 Deferred Compensation Plans," the County has excluded the plan assets and liabilities from the government-wide financial statements because the County does not have significant administrative involvement in the plan or perform the investment function for the plan. All such amounts are not subject to the claims of the County's general creditors.

12. Commitments and Contingencies

Claims and Judgments

The County is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The County maintains certain comprehensive general liability and property insurance, public official and law enforcement liability insurance, and excess auto liability insurance for claims. It is the opinion of management and legal counsel that such claims and lawsuits are either covered by the County's insurance policies, if they should exceed the County's retained risk, or are recorded in the government-wide financial statements. There was no reduction in insurance coverage during the year from coverage in the prior year. During the past three fiscal years, the amount of settlements in cases covered by insurance have not exceeded the insurance coverage. The County is substantially self-insured for its vehicles as well as for all other perils including workers' compensation and general liability below \$500,000.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

Liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). Claims liabilities, including IBNR, are based on the estimated ultimate cost of settling the claims, and include incremental costs for the hiring of special counsel and expert witnesses. Claims liabilities are estimated by a case-by-case review of all claims and the application of historical experience to outstanding claims. Estimates of IBNR are based on historical experience. The liability for claims and judgments is reported on the government-wide statement of net assets. At June 30, 2003, the amount of this liability was approximately \$1.8 million. This is the County's best estimate based on available information. Changes in the reported liability since July 1, 2001 are given below.

Fiscal Year	Liability at Beginning of Year	Current Year Claims and Changes in Estimates	Claim Payments	Liability at End of Year
2002	\$ 820,993	\$ 185,797	\$ (185,797)	\$ 820,993
2003	\$ 820,993	\$ 1,883,492	\$ (885,180)	\$ 1,819,305

Purchase Commitments

Contractual commitments for capital projects, supplies and other expenditures at June 30, 2003, except those expected to be paid through reimbursable grants, are reflected in the governmental fund financial statements as fund balance reserved for encumbrances.

13. Landfill Closure and Post-closure Care Costs

GASB Statement No. 18, "Accounting for Municipal Solid Waste Landfill Closure and Postclosure Care Costs," which is based on the October 9, 1991 United States Environmental Protection Agency (EPA) rule, "Solid Waste Disposal Facility Criteria," establishes closure requirements for all municipal solid waste landfills that receive waste after October 9, 1991. In accordance with GASB Statement No. 18, the County estimates in advance the total cost of closure and post-closure care during the life of those landfills rather than after their closings. Federal and state laws and regulations require the County to place final covers on certain landfill sites when they stop accepting waste and to perform certain maintenance and monitoring functions at the sites for thirty years after closure. Annual additions to the liability for closure and post-closure care costs are based on landfill capacity used as of each balance sheet date.

The County has three landfill sites - Kekaha Landfill Phases I and II and Halehaka Landfill. The County has closed the Kekaha Landfill Phase I and Halehaka Landfill. The County estimates the closure costs for the Kekaha Landfill Phase II to be approximately \$7.5 million based on estimates provided by project engineers. At June 30, 2003, approximately 94% of the total capacity of the Kekaha Landfill Phase II had been used, and the estimated remaining landfill life is approximately one year. The County is currently

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

seeking approval for expansion of Kekaha Landfill Phase II. The proposed expansion is estimated to extend the life of the landfill by approximately four years.

The total estimated closure costs accrued in the government-wide financial statements for the Kekaha Landfill Phase II, and the post-closure costs for the Kekaha Landfill Phases I and II and Halehaka Landfill was approximately \$18.1 million, which may change due to inflation, technology or applicable laws or regulations. However, the total estimated closure costs for the Kekaha Landfill Phase II, and the postclosure costs for the Kekaha Landfill Phases I and II and Halehaka Landfill is approximately \$18.6 million. Therefore, as of June 30, 2003, approximately \$500,000 remains to be accrued in subsequent periods.

The County is required by state and federal laws and regulations to assure that the funds for corrective action closure and postclosure care will be available when needed. The County charges commercial businesses a tipping fee for each ton of waste deposited at the Kekaha Landfill Phase II. The tipping fees will be used to offset the cost of closing the landfill. As of June 30, 2003 the County has collected approximately \$2.8 million in tipping fees and includes this amount in the Solid Waste Fund under landfill closure and postclosure cost. As of June 30, 2003, the County met applicable financial assurance requirements specified in 40 CFR Section 258.

14. Component Unit Disclosures

Safe Drinking Water Act

The Department is subject to the requirements of the Safe Drinking Water Act (the Act) which is administered by the State of Hawaii Department of Health on behalf of the United States Environmental Protection Agency. Management indicated that the Department is in full compliance with the requirements of the Act and is not aware of any matters under the Act that materially affected or is currently affecting the Department's customer service area.

Water System Matters

The Department has encountered water system capacity issues in certain customer service areas. In addition, the Department's water system infrastructure in certain areas requires significant upgrades or rehabilitation. The Department has evaluated these matters in connection with the development of their long-range plan, Water Plan 2020, and a water system rehabilitation plan. Water Plan 2020 was approved in March of 2001 and resulted in an approved rate increase as of July 1, 2001 which will provide the necessary resources to maintain water facilities, increase service and also help with water conservation. In addition to the rate increase effective July 1, 2001, another rate increase was to take effect on July 1, 2003, however on April 16, 2003, the Board of Water Supply approved an amendment to defer the rate increase for one year, from July 1, 2003 to July 1, 2004.

Comprehensive Annual Financial Report For the Year Ended June 30, 2003

15. Collective Bargaining Agreements

County employees are members of seven different bargaining units. All seven bargaining units have contracts that expired on June 30, 2003. The police officers union (SHOPO) has signed a four year contract for its members with wage increases averaging four percent per year starting July 1, 2003. Other employee union collective bargaining negotiations are in process or are in arbitration.

16. Related Party Transactions

The Department charges the County for fire protection services (hydrant use) at agreed-to rates that approximate the costs for such services. The County provides certain services to the Department and charges the Department for these services at an amount equal to the charge for fire protection services. The amounts charged approximated \$436,000 for the year ended June 30, 2003.

17. New Pronouncements for Financial Reporting

The Governmental Accounting Standards Board (GASB) has issued Statement No. 40, "Deposit and Investment Risk Disclosures," which updates the custodial credit risk disclosure requirements of GASB Statement No. 3 and establishes more comprehensive disclosure requirements addressing other common risks of the deposits and investments of state and local governments and is effective for financial statements for the period beginning June 15, 2004. This Statement is not expected to have a material impact on the financial statements.
